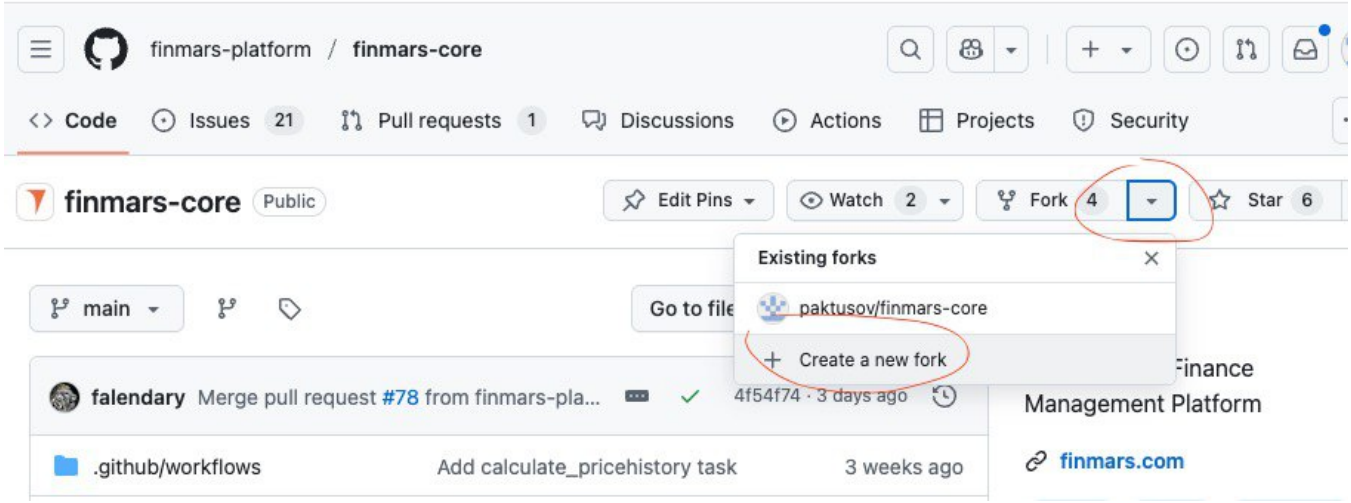
How contribute Finmars-platform

- Create Pull Request in repositories

Create Pull Request in repositories

Here is a example of contributing Finmars repositories

1. **Create fork**



2. **Clone this fork**
   Example:

```
git clone https://github.com/<your-account>/<repo>.git
cd <repo>
```

3. **Create new branch**
   Example:

```
git checkout -b <feat>
```

4. **Make changes**
5. **Fix change**
   Example:

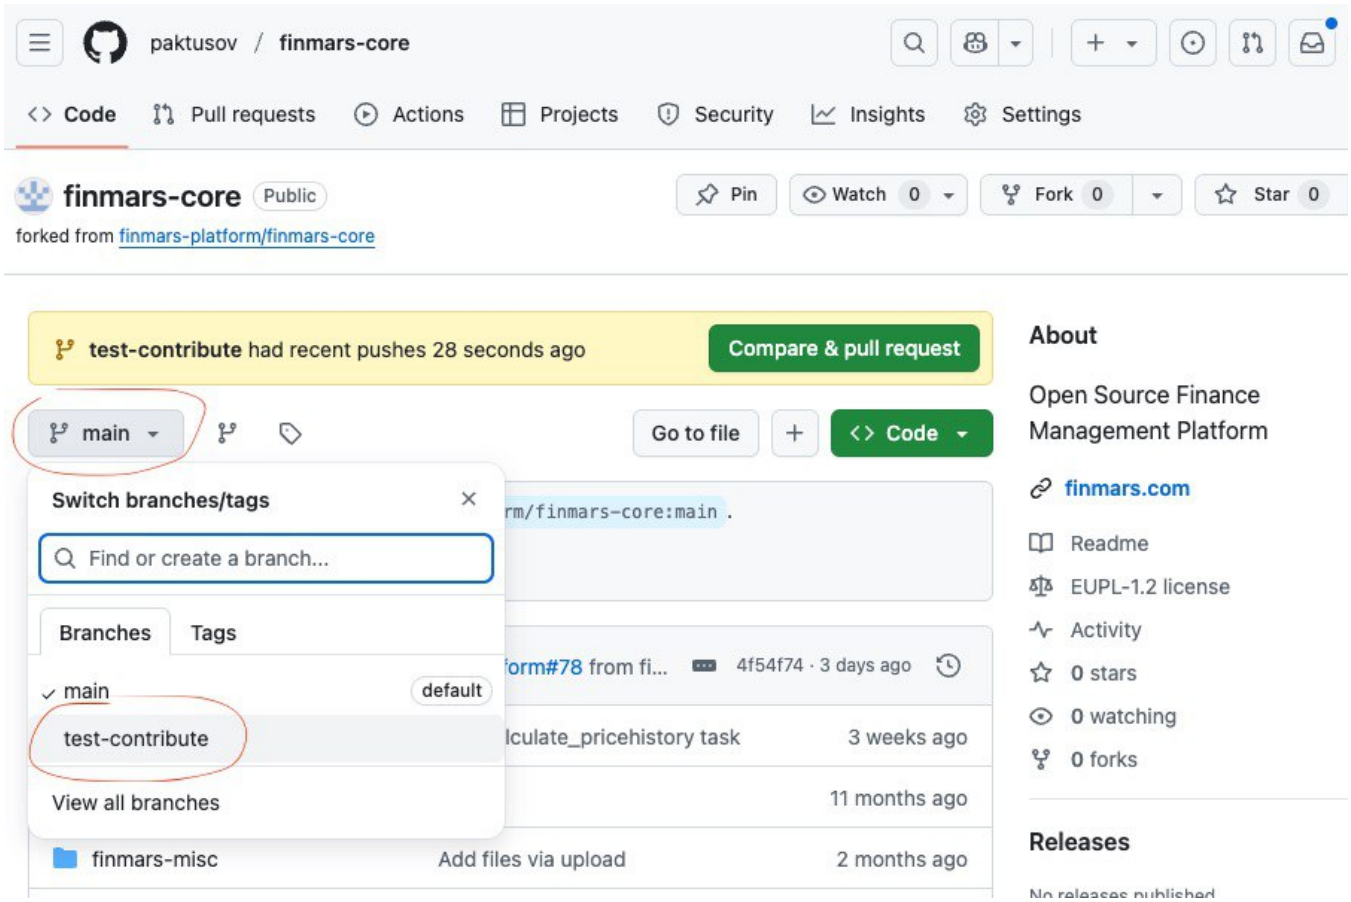
```
git add .
git commit -m "<commit message>"
```

6. **Push changes**
   Example:

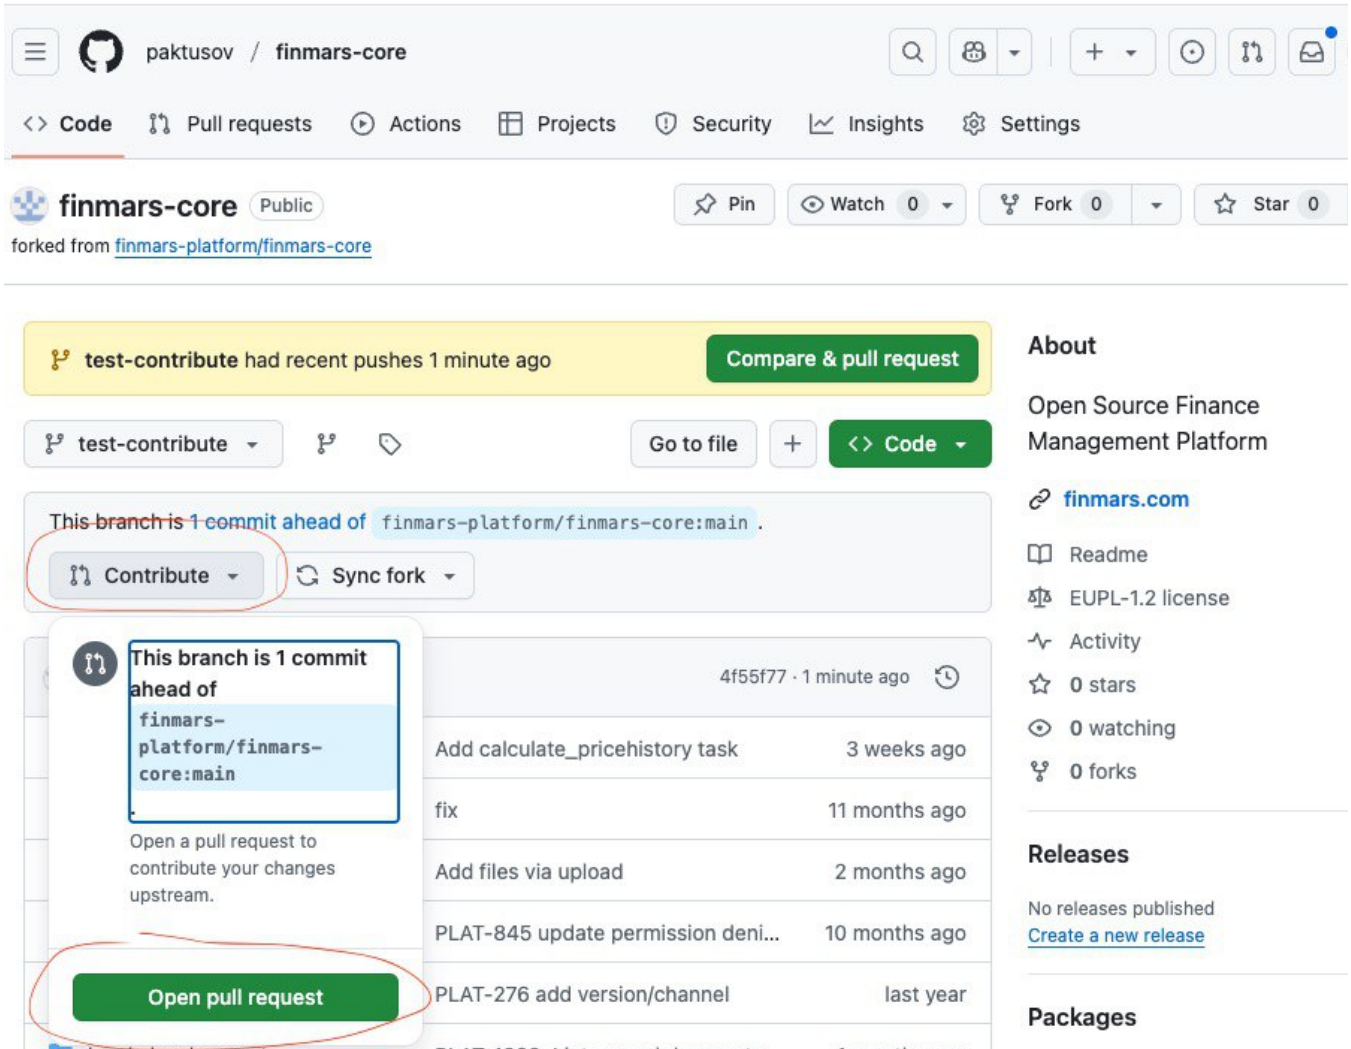
```
git push --set-upstream origin <feat>
```

7. **Create Pull request**

1. Checkout to <feat> branch in github.com



2. Open Pull Request



3. Check source branch is base repository and main branch and create pull request
