

How to Install/Update add-on from Marketplace

Prerequisites

We assume you have all prerequisites you may need, including:

1. [Get Access to Finmars](#)
2. [Get Access to Finmars Space](#)
3. You have the internet access

Installing/Updating add-on from Marketplace

Step 1. To install or update an add-on from the Marketplace, go to **Marketplace**. Locate the add-on you want to install or update.

1. If you want to install **latest stable version** - click install/update on the add-on card.
2. If you want to install **particular version** please refer to step 5.

Picture 1. Installing/updating the add-on

Step 2. Confirm that the installation has started. A pop-up window will appear in the top-right corner.

Picture 2. Starting installation

Step 3. Confirm that the installation was successful. A pop-up window will appear in the top-right corner with the message "**Task Finished.**"

Picture 3. Successful installing/updating the add-on from marketplace

Step 4. Additional confirmation can be checked in the Task section. Navigate to **Configuration > Tasks** in the menu and verify the status. The expected result is **"Success"** without any errors.

Picture 4. Successful installing/updating the add-on from marketplace checking the result

Step 5. If you want to install a different version of an add-on, navigate to the **Marketplace** from the left-side menu. Use the search bar at the top to find the required add-on. Click on the **"Show Details"**.

Picture 5. Navigating to the add-on details

Step 6. In the add-on details, locate the version selection dropdown. First, you need to select the **release type** (Stable or Release Candidate) and then choose the **desired version** from the available options.
