Description

Financial meaning

Base transactions are the core financial actions that record what actually happens with your money or investments. They're the most essential and original records in a financial system — like receipts for everything going in or out of your portfolio.

Platform abstraction

Base Transactions in the Finmars platform represent the **core building blocks of financial activity tracking**. Each base transaction shows the **essential details** of a financial action (like a purchase, sale, or cash movement), but in a simplified format — before it's split into accounting entries like cash or positions.

Examples

Platform screenshots with a description of a record table example.

Cookbook

CRUD

Operations within platform.

Use Cases

What for it's used.

F.A.Q.

Frequently asked questions.
