## Description

### *Financial meaning*

**FX Rate**, or exchange rate, is the price of one currency (base currency) in terms of another currency (quote currency).

### *Platform abstraction*

**FX Rate** in Finmars (a.k.a. Currency history) is an entity which evaluates a currency (base currency) in system default currency (quote currency, USD by default) on a specific date for specific pricing policy. By default, system currency is set to USD, it can be changed in default settings, but it's not recommended due to some modules may depend on system default currency set as USD.

## Examples
