Description

Financial meaning

Prices represent the market value or quoted price of a financial instrument at a specific point in time. They are essential for valuation, performance measurement, and accurate reporting across financial systems.

Platform abstraction

In the Finmars platform, a Price is a separate entity linked to an [Instrument](#) and dated to a specific moment. Each price entry stores the principal value, accrued interest component (for debt instruments), a [pricing policy](#) identifier (e.g., Standard, Custom), and valuation-related fields like Yield to Maturity (YTM) and Duration.

Prices are used in:

- Providing market or modeled values for [instruments](#) held in [portfolios](#).
- Defining end-of-day valuations and snapshots for asset positions.
- Supporting duration, yield, and factor-based sensitivity analyses.
- Assisting in generating fair value [reports](#), [P&L](#), and balance sheet entries.

Examples

Instrument	Date	Pricing Policy	Principal Price	Accrued Price	Factor	YTM	Modified Duration	Is Temporary Price
------------	------	----------------	-----------------	---------------	--------	-----	-------------------	--------------------

BAIDU INC	2023-03-14	Standard	144.9500	0.000	1	0.00	0.000	False
-----------	------------	----------	----------	-------	---	------	-------	-------

- **Instrument** : name or identifier of the financial instrument.
- **Date** : the date for which the price is recorded.
- **Pricing Policy** : method used for price calculation (e.g., Standard).
- **Principal Price** : main price of the instrument excluding accrued interest.
- **Accrued Price** : accumulated interest up to the pricing date.
- **Factor** : multiplier used to adjust the nominal or market value of the instrument.
- **YTM** : yield to maturity, representing the expected return if the instrument is held until maturity.
- **Modified Duration** : measure of the price sensitivity of the instrument to interest rate changes.
- **Is Temporary Price** : flag indicating if the price is temporary (**True** or **False**).
