

Configuration Installation

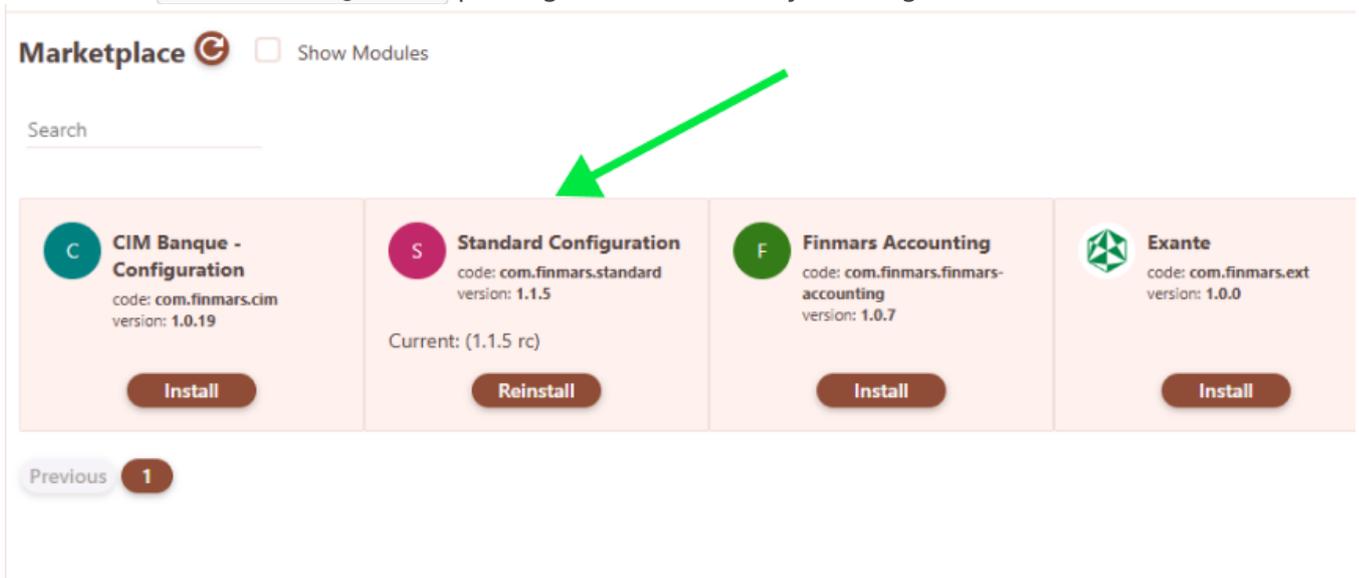

Installing Modules

Prerequisites

- A created database with an activated license

Actions

1. Go to `Settings -> Configuration -> Marketplace`
2. Select the `Standard Configuration` package and install it by clicking the install button

The screenshot displays the 'Marketplace' interface with a search bar and a 'Show Modules' checkbox. Below the search bar, there are four module cards:

- CIM Banque - Configuration**: code: `com.finmars.cim`, version: `1.0.19`, with an **Install** button.
- Standard Configuration**: code: `com.finmars.standard`, version: `1.1.5`, with a **Reinstall** button. A green arrow points to this card. Below the card, it says 'Current: (1.1.5 rc)'. A 'Previous' button with the number '1' is visible below the first card.
- Finmars Accounting**: code: `com.finmars.finmars-accounting`, version: `1.0.7`, with an **Install** button.
- Exante**: code: `com.finmars.ext`, version: `1.0.0`, with an **Install** button.

3. Wait for the module installation to complete

4. You can check the success of the module installation in the **Data -> Tasks** section. All tasks should be completed. Completion is indicated by a brown rectangle.

The screenshot shows the 'Tasks' section of the Finmars application. The interface includes a sidebar with navigation options like Dashboard, Home, Reports, Data, Transactions, Valuations, Import, and Reconciliation. The main area displays task statistics for three workers: celery@worker01, celery@worker00, and meta. Below the stats is a table of tasks. A green arrow points to the 'Status' column, which contains brown rectangles indicating completion. The tasks listed are 'Configuration Import' tasks (IDs 12-21) and 'Install Configuration From Marketplace' (ID 12).

Status	Result	Date	Task	User
■	Errors: Skip: Success:	2024-07-15	Configuration Import [21]	apetrushkin
