**data\_transformer.ipynb** - main jupyter python script that works with Finmars REST API to calculate all metrics and export results as .json into same folder

**experts.json** - meta file with all information about expert and its portfolios and closing periods, it used in **data\_transformer.ipynb**

**expert\_portfolios.json** - result file that used in Dashboard Layout to output all the calculation to User Interface

**expert\_N\_result.json** - result file of single expert, tmp file, used to be concatenated into single result file **data\_transformer.ipynb**

**experts\_mock.json** - example file of expected structure in experts.json

**experts\_portfolios\_mock** - example file of expected result of **data\_transformer.ipynb**

**index.html** - actual dashboard page that showed in Finmars Dashboard Layout
