

# Updating Guide

Here is short guide of how to update Finmars.

Warning: Do backup before doing update!

To find latest version go to <https://github.com/finmars-platform/finmars-core> repository to see latest **Tag**

1. **Connect to your VM**

Example:

2. Go to Finmars Directory

```
cd /opt/finmars
```

3. Stop your Finmars server

```
make down
```

4. Edit **docker-compose.yml**

replace version in property **image**: e.g. **finmars-core:1.18.0** to **finmars-core:1.19.0**

```
services:

#...

core:
  image: docker.io/finmars/finmars-core:1.18.0 # replace to 1.19.0
  volumes:
    - ../finmars-core/poms:/var/app/poms
  env_file:
    - .env
  environment:
    - DB_NAME=core_realm00000
  depends_on:
    - db
    - rabbitmq
    - redis
    - keycloak
  ports:
    - "8000:8080"
```

workflow:

image: docker.io/finmars/finmars-workflow:1.18.0 # replace to 1.19.0

volumes:

- ../finmars-workflow/workflow:/var/app/workflow

env\_file:

- .env

environment:

- DB\_NAME=workflow\_realm00000

depends\_on:

- db
- rabbitmq
- redis
- keycloak

ports:

- "8001:8080"

portal:

image: docker.io/finmars/finmars-portal:1.18.0 # replace to 1.19.0

env\_file:

- .env

ports:

- "8080:8080"

vue-portal:

image: docker.io/finmars/finmars-vue-portal:1.18.0 # replace to 1.19.0

environment:

- Nuxt\_APP\_BUILD\_ASSETS\_DIR=/realm00000/v/\_nuxt/

env\_file:

- .env

ports:

- "8081:8080"

workflow-portal:

image: docker.io/finmars/finmars-workflow-vue-portal:1.18.0 # replace to 1.19.0

environment:

- Nuxt\_APP\_BUILD\_ASSETS\_DIR=/realm00000/w/\_nuxt/

env\_file:

```
- .env  
ports:  
- "8082:8080"
```

## 5. Apply changes

```
make migrate  
make up
```

Well done!
