

# Install Exante Data Transformer

Go to Marketplace and look for **Exante Data Transformer**

Install this module

The screenshot shows the Marketplace interface with a search bar containing 'Exante'. Below the search bar, there are four module cards:

- Exante** (code: `com.finmars.exante`, version: `1.0.1`): Current: (1.0.2 stable) with an **Update** button.
- Exante** (code: `com.finmars.ext`, version: `1.0.0`): Current: (1.0.0 stable) with a **Reinstall** button.
- Exante Broker** (code: `com.finmars.exante-broker`, version: `1.0.1`): Current: (1.0.1 stable) with a **Reinstall** button.
- Exante Data Transformer** (code: `com.finmars.exante-data-transformer`, version: `1.0.0`): Current: (1.0.0 stable) with a **Reinstall** button.

At the bottom left, there is a 'Previous' button with a '1' in a circle next to it.

So after you install it you need to refresh your storage (Click on top right button to Refresh Storage)

The screenshot shows the 'Finmars Workflow' interface. At the top left, there is a hamburger menu icon and the text 'Finmars Workflow'. At the top right, there are refresh and help icons. Below the header, there is a 'Definitions' section containing a table:

User Code	Name	Periodic	Role	Run
<code>com.finmars.exante-broker:get-positions</code>			Worker	
<code>com.finmars.exante-broker:get-transactions</code>			Worker	
<code>com.finmars.exante-data-transformer:transform-positions</code>			Worker	

So after your Storage is refreshed you will see `com.finmars.exante-broker:get-positions`

It means you installed Exante Data Transformer Successfully
