

Creating Simple Report

You finished your installation and ready to create new PDF Report Template

So you need to open your report_builder.html in New Tab

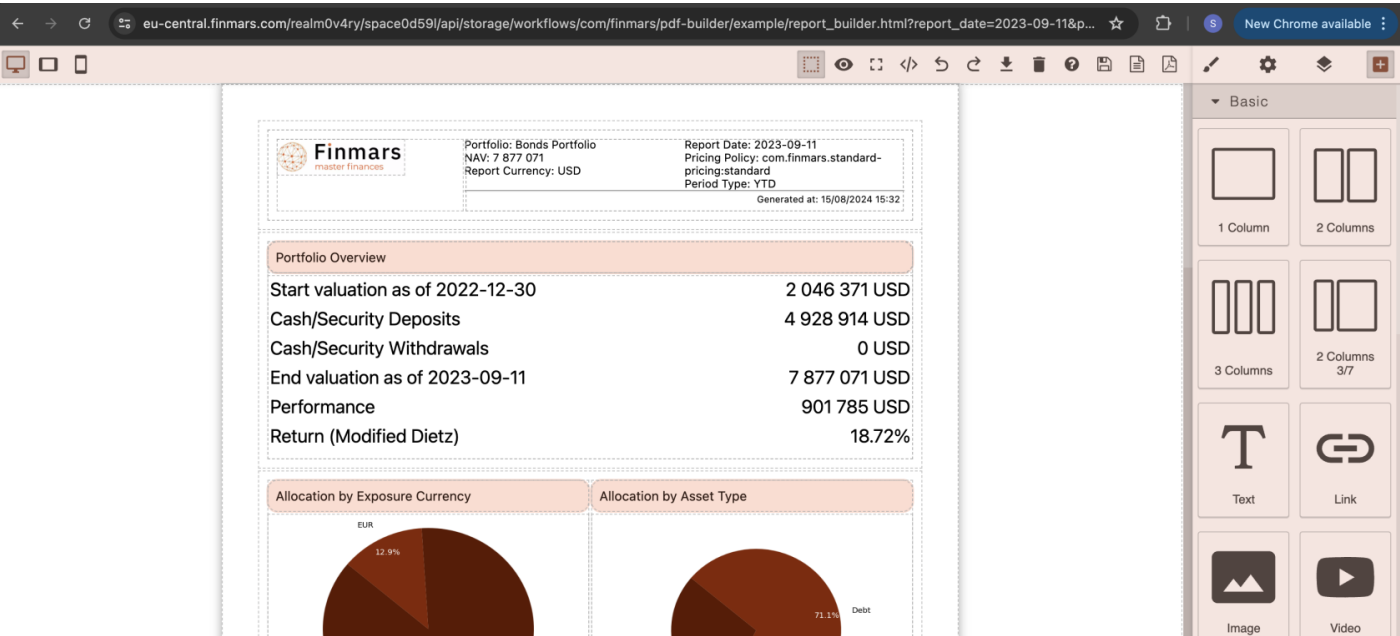

Another thing to consider:

if you use com.finmars.pdf-builder/example_builder.html you **must pass query parameters** to run it

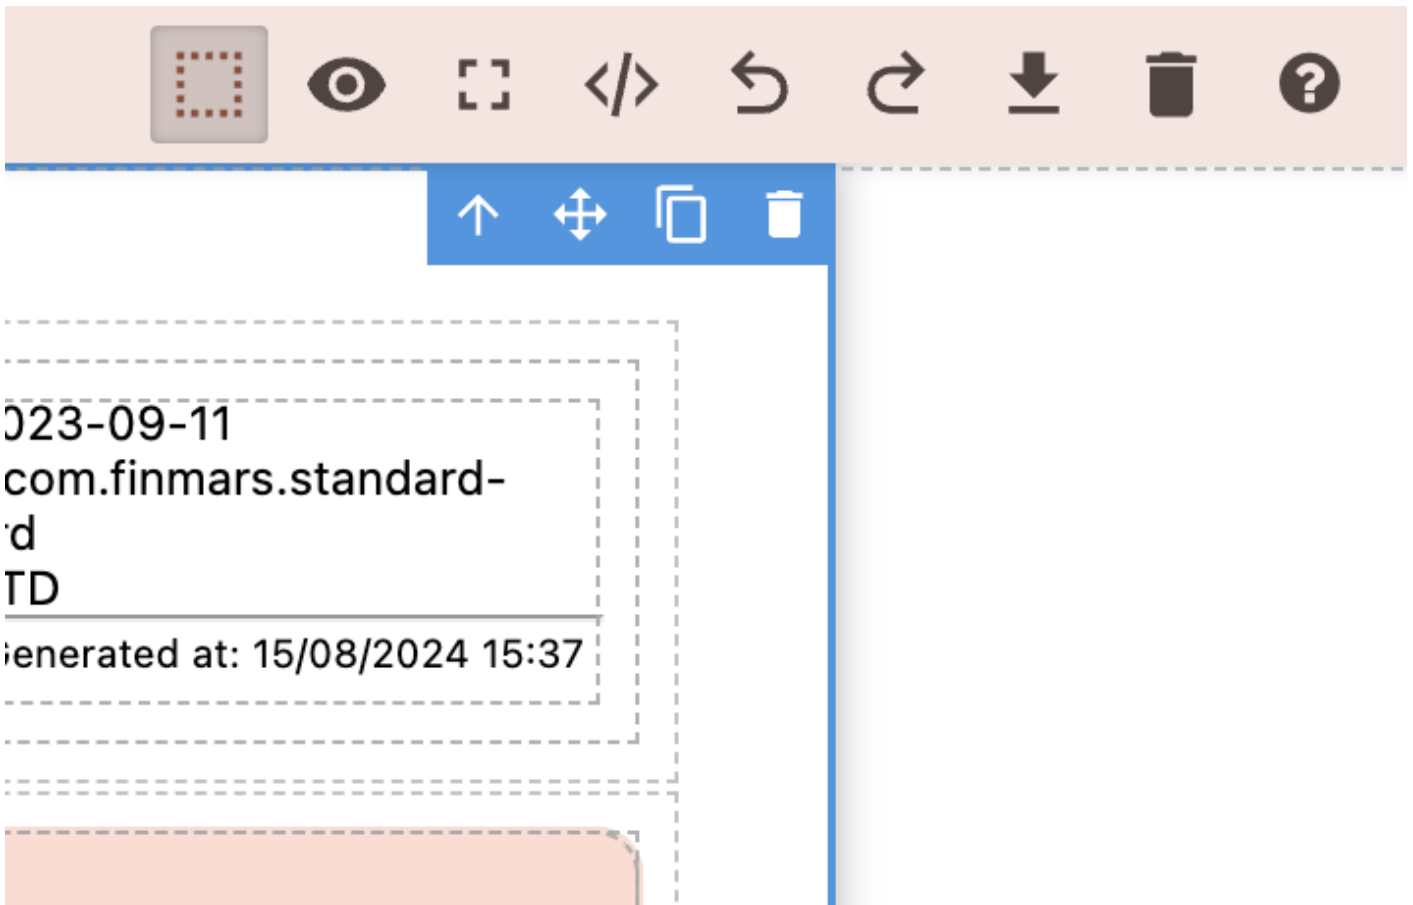

Example: ?report_date=2023-09-11&portfolio=Bonds%20Portfolio

So in this example, we must declare **Portfolio User Code** and **Report Date** to make it run

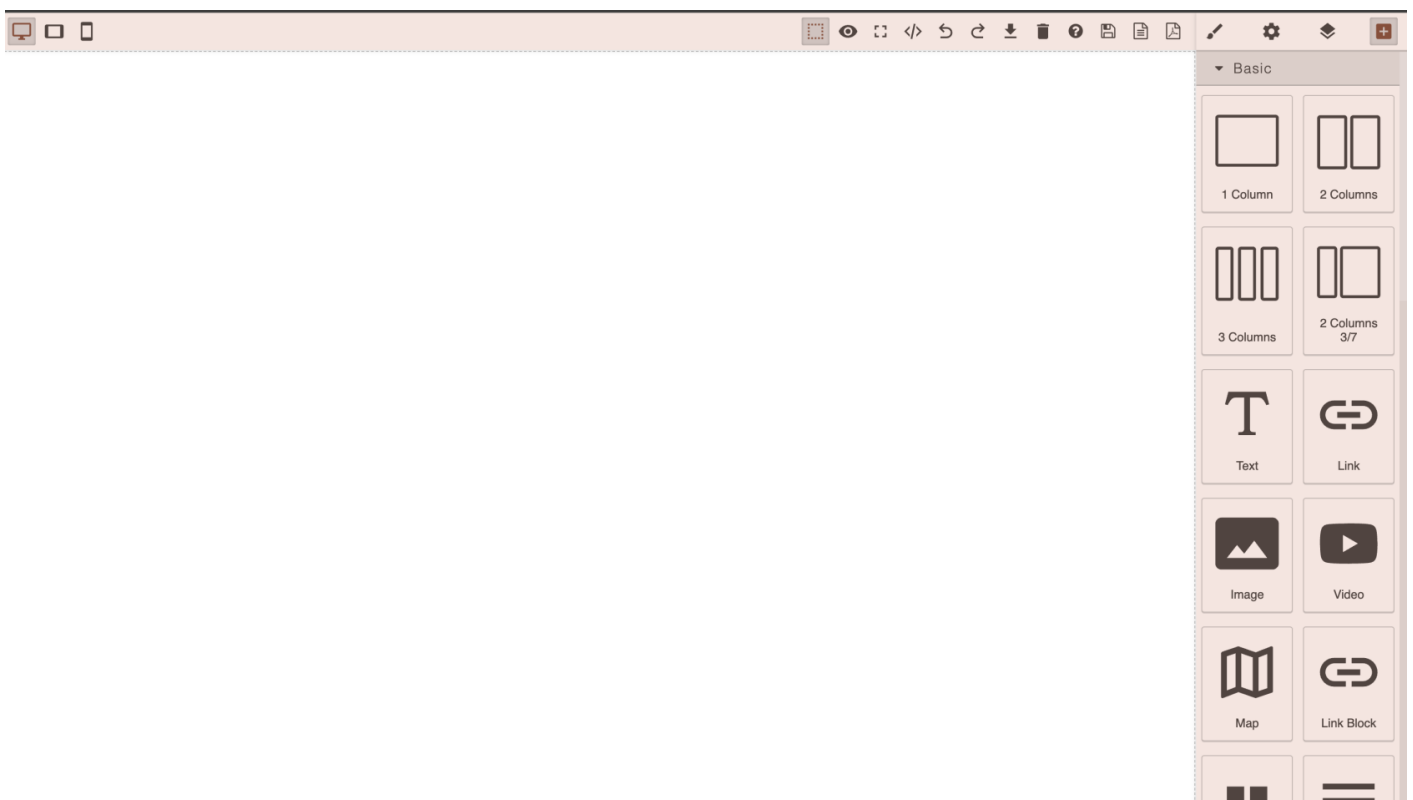

But lets start from the begining

You can hover over elements and then you will see Delete Icon, if you press Element will be deleted

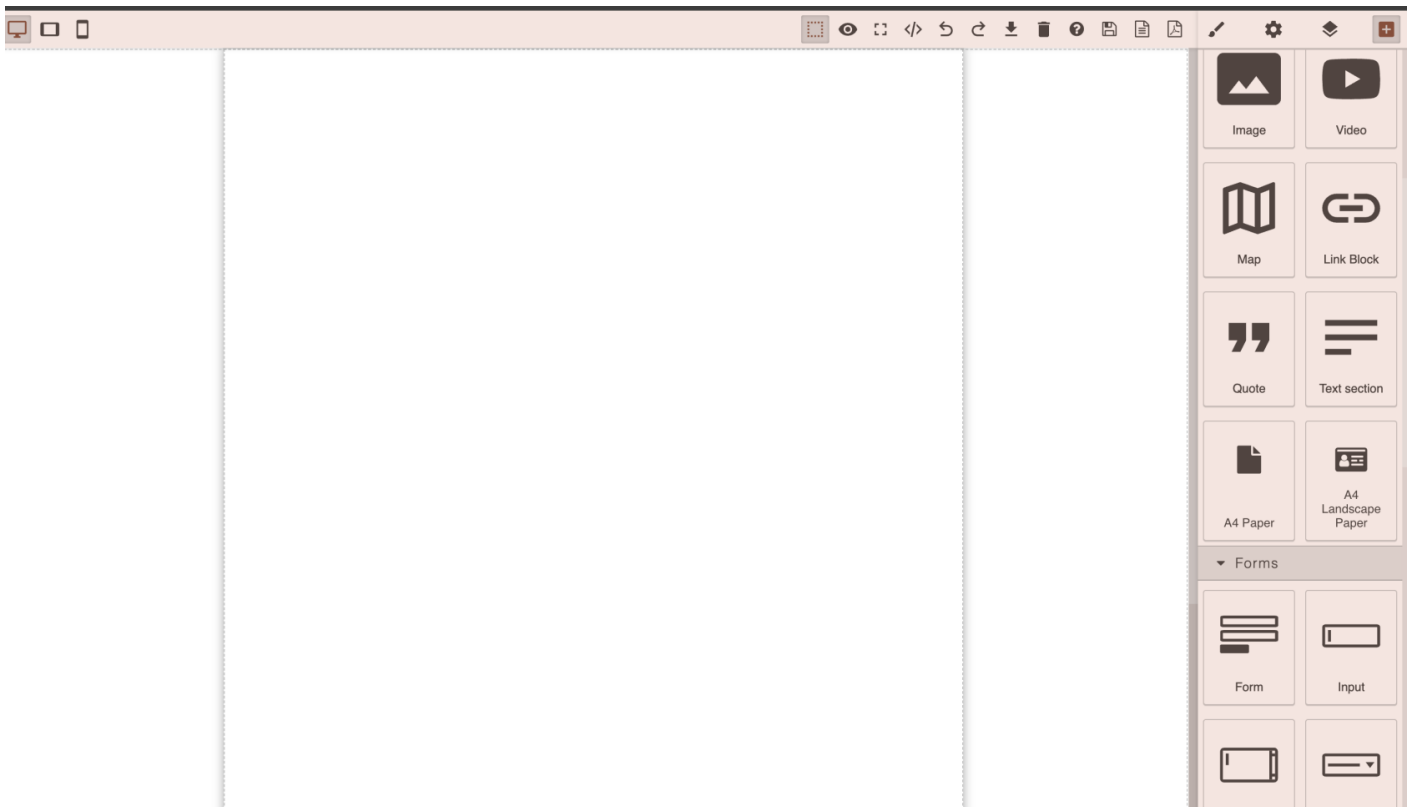

Okay, I cleared all the canvas

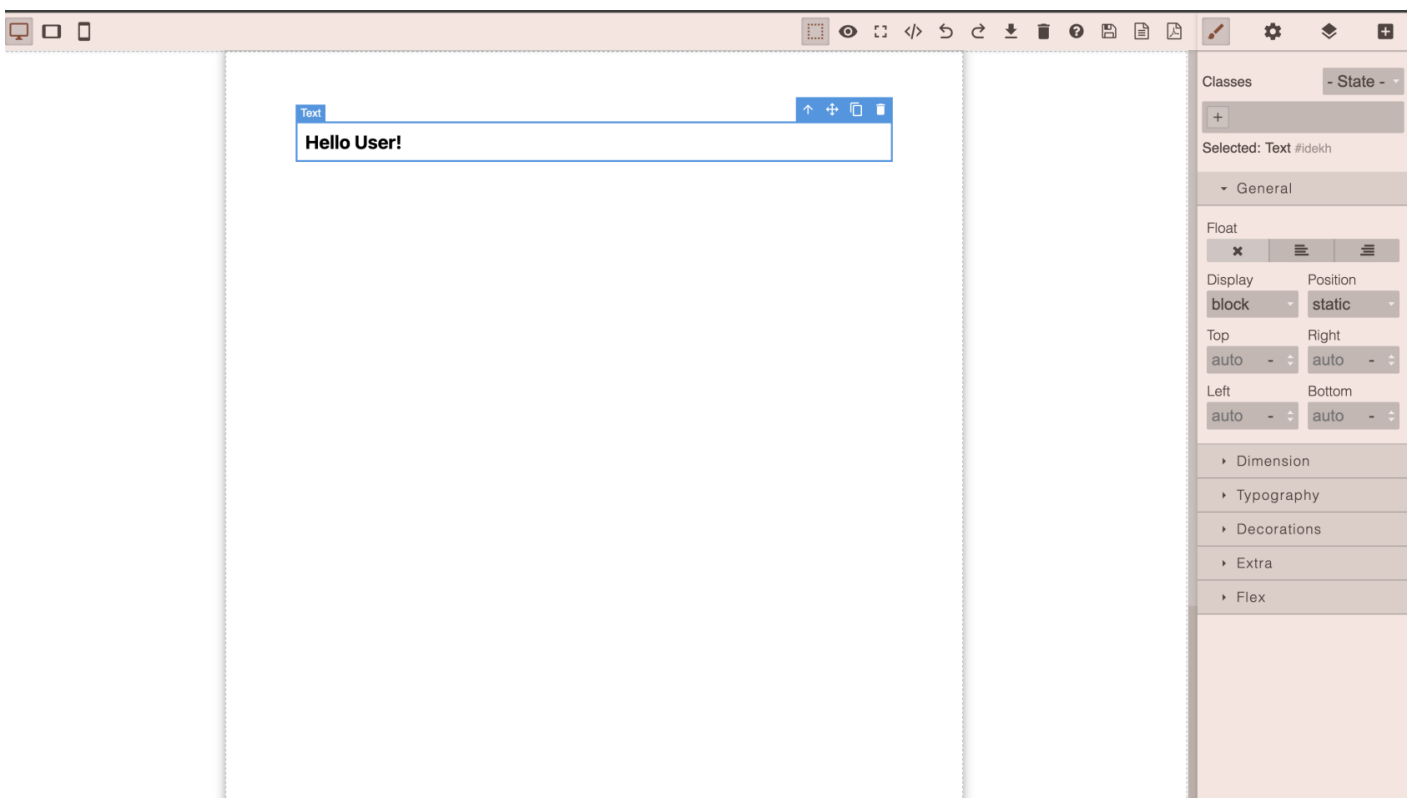

In Right Top corner you have square button with + sign, it will open menu of **Blocks** that can be places on canvas

Right now, I scrolled down and drag and dropped **A4 Paper block** on canvas. Simple as that!

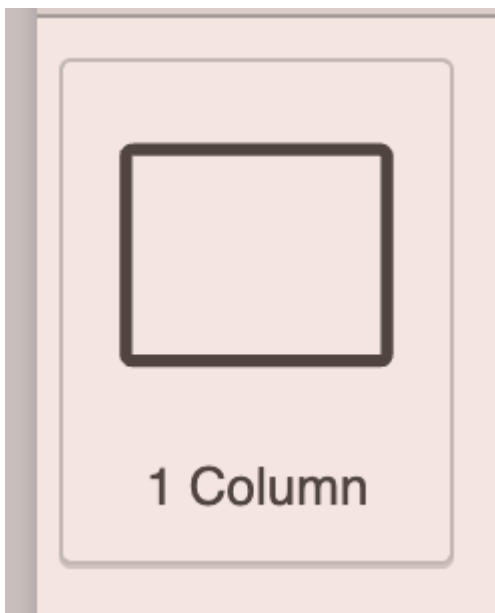

Now I can add some text!

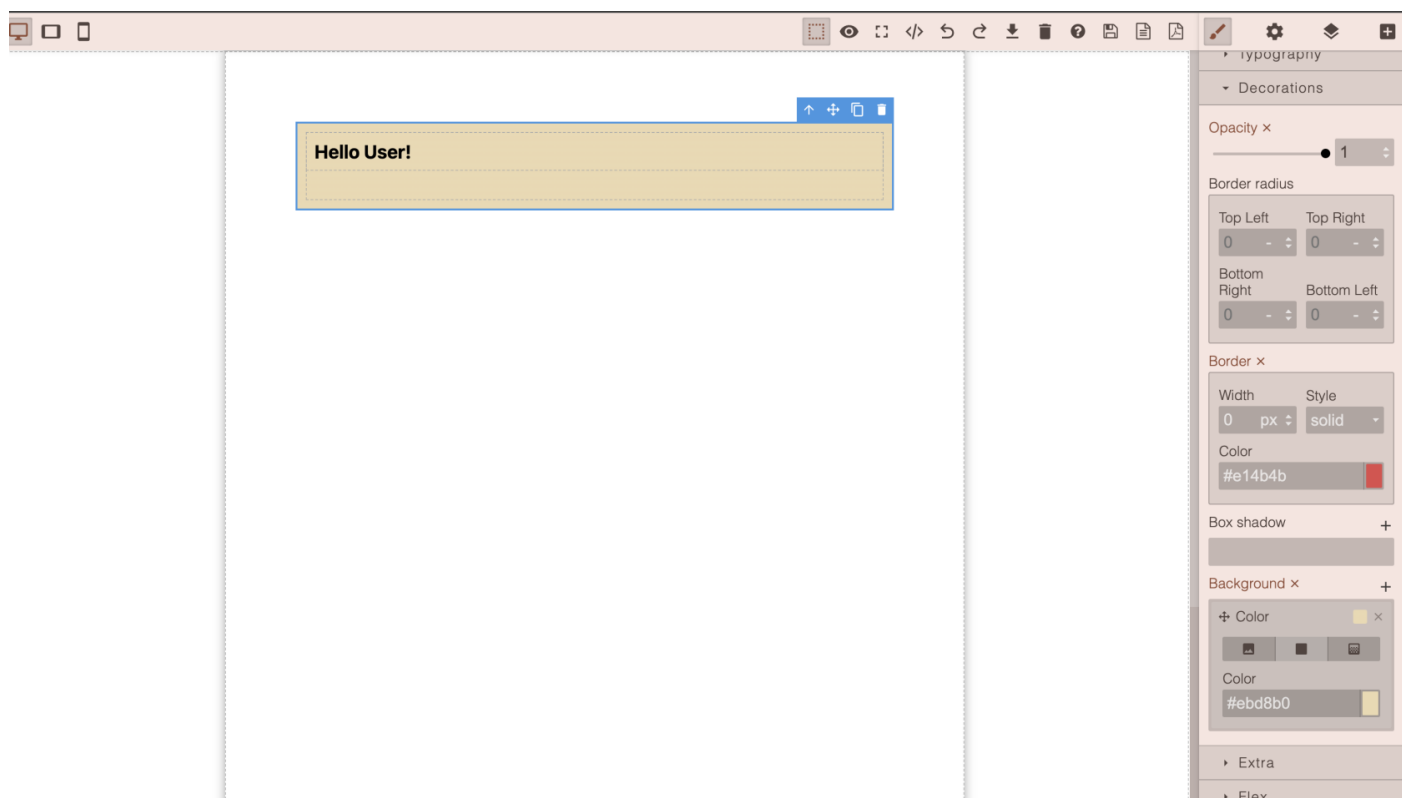

Lets Put this text into Card

So I wrapped my text with

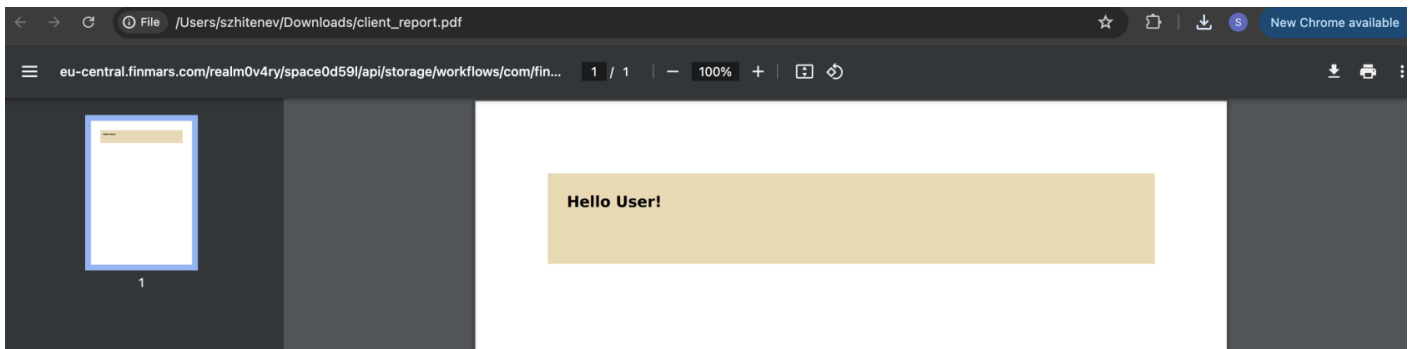

Then I click on that element and now my right sidebar has Brush Active Menu, scroll down to **Decorations** section, then add Background, any color you like

So, lets test it, press export to PDF (its far right button with pdf icon)

Amazing, you created your first PDF report, well done!

Keep going! Go to <https://docs.finmars.com/books/pdf-builder/page/add-dynamic-content-to-your-pdf-report>
