

# Vault Setup

To access Exante REST API we need to configure Vault

 **Finmars**  
master finances

<

 Dashboard

 Home

 Reports

 Data

 Transactions

 Valuations

 Import

 Reconciliation

## Vault

### Finmars Vault

Vault is a secure storage solution for storing sensitive information and resources.

To activate Vault, please click the button below. Please note that you need a secure location on your side.

Init Vault

Proceed with all the steps

 **Finmars**  
master finances

<

 Dashboard

 Home

 Reports

 Data

 Transactions

 Valuations

 Import

 Reconciliation

OK: Vault Configured. Vault is operational for storing secrets

Show more

Seal

Engine: finmars

Secret: client-1

Edit

Delete

Add Secret

Delete Engine

Add Engine

itech

 eu\_central\_2\_szhitene

In the end your Vault should be operational and you need to add there your credentials of Exante

## Account to their REST API
